working world

# EY Assurance Business Apprenticeship Programme

On- the-job-  
experience  
without going  
to university.

In Assurance we make sure that businesses are protected from risks that can affect their reputation and performance. As external auditors, we help companies and governments publish accurate financial accounts others can rely on.

Our Business Apprenticeship programme will immerse you in client work within our Assurance practice and will give you a heads start towards a professional qualification. As part of this apprenticeship you will progress your career faster than your peers who chose to go to university. At the end of the programme you will be a qualified accountant with five years of practical experience. You will also have built a fantastic network of people who will mentor you to ensure you reach your potential.

A role as Business Apprentice, combined with achieving an internationally recognised qualification, should not be underestimated in terms of the experiences it opens up. Having gained a grounding in the finance industry and exposure to our large client base, you'll have a wealth of practical experience to compound your theoretical knowledge. And this will open opportunities both inside and outside EY.

## Over the five year programme you will improve your skills in:

- ▶ Leadership
- ▶ Communication
- ▶ Presenting
- ▶ Analysis of data
- ▶ Report writing

You will join us following the completion of 3 A-Levels, 5 Scottish Highers or equivalent and spend 5 years on the programme – You will complete a CFAB qualification leading to full qualification through the ICAEW.
