

MyBlueCity 2018 – List of Exhibitors

Entrance Hall

Name of Entity	Logo	Exhibitor Description	Website
Sun Concept, Lda - Solar Boat Builders		Sun Concept is a solar boat building shipyard. The company's core business is developing and building boats that have their energy produced by the photovoltaic panels that exist in the vessel.	www.sunconcept.pt

MyBlueOffshore

Name of Entity	Logo	Exhibitor Description	Website
SpilLess (CIIMAR)		SpilLess brings an innovative and environment-friendly solution to tackle oil spills incidents that may occur inside ports, around industrial and extraction facilities, or during transport activities. This solution is based on the production of native microorganisms for bioremediation and the adaptation of unmanned autonomous vehicles for in-situ contamination combat.	www.spilless.ciimar.up.pt
PenWave		PEN WAVE produces several kind of microalgae (Rhodomonas, Calcitrans, Isocrysis, etc), Copepods (Acartia tonsa) and also provides technical consultation for these purposes.	www.pen-wave.org
SafetyMar, Lda.		SafetyMar distributes safety equipment in a showroom and e-commerce channel. It also includes training on Sea Survival for Fisherman and Sailors, Fire Fighting for Fisherman and Industry, First Aid and Basic Life Support/AED for community.	www.safetymar.pt www.loja.safetymar.pt
TOPAME		The TOPAME APP allows you to get an optimized seaway to reduce fuel consumption and travel time. Based on oceanographic data resolution, the TOPAME algorithms create shipping routes in a simple, instant and OFFLINE mode.	www.topame.pt
mOceanSense		Moceansense is the combination of "motion" analysis, in the "ocean" and aquatic environment, measured by "sensors" to deliver the best live sport performance, evaluation and interpretation, throughout telemetry and interactive dashboards for broadcasting in nautical sports.	www.moceansense.com
Surf Social Wave		Surf Social Wave promotes social inclusion of children, young people and adults through surf and facilitates access to jobs related to the surf ecosystem.	www.surfsocialwave.org

MyBlueHarbour

Name of Entity	Logo	Exhibitor Description	Website
Undersee		UNDERSEE enables Precision Aquaculture for global market. We provide a plug-and-play integrated solution to monitor and collect aquaculture data, scalable and easy to use (hardware sensor and cloud-based dashboard) coupled with numerical models and IoT tools.	www.undersee.io/home/
Docapesca – Portos e Lotas, S.A		Docapesca manages all the fishing ports in mainland Portugal. It is structured in delegations, comprising 22 auction markets and 31 sales outlets. It will showcase the electronic and online fish auction and present the Fisheries for a Sea Without Litter project, to make fishermen aware of the importance of collecting and separating marine litter during the fishing activity.	www.docapesca.pt
DGRM – Direção-Geral de Recursos Naturais, Segurança e Serviços Marítimos		DGRM has as its mission the development of safety and maritime services, including the maritime-port sector, the implementation of fisheries policies, aquaculture, manufacturing and related activities, the preservation and knowledge of marine resources, as well as ensuring the regulation and control of the activities carried out in these areas.	www.dgrm.mm.gov.pt
APP – Associação dos Portos de Portugal		APP is a Non-profit organization, created in 1991, that provides a debate platform for information exchange related to the common interests of ports and maritime transportation.	www.portosdeportugal.pt

MyBlueFactory

Name of Entity	Logo	Exhibitor Description	Website
Lusalgae, Lda.		Lusalgae is Marine Biotechnology startup that works primarily with high quality seaweed. The company is proud to be eco-responsible in all practices and activities always working towards a greener future. Lusalgae will showcase seaweed aquaculture methods, a way to produce macroalgae that can be applied in various industries.	www.lusalgae.pt
A4F		ALGATEC is an Eco Business Park designed to welcome entrepreneurial companies and projects in the algae and microalgae sector. Come find out more about the projects and the microalgae production technologies being installed.	www.algatec.eu
Biotrend		Biotrend provides services for the development, optimization and scale-up of bioprocesses based on microbial diversity and renewable bioresources, including marine, applying circular economy principles.	www.biotrend.biz
University of Coimbra - Seaweed Biorefinery		A project from the University of Coimbra that includes an integrated socio-economic analysis on life-cycle assessment of advanced biofuels production from seaweed biorefinery as port fuel for maritime transport sector.	www.uc.pt
IPMA - Portuguese Institute for the Sea and Atmosphere		IPMA I. P. is the state laboratory whose mission is to promote and coordinate scientific research, technological development, innovation and service on the seas and atmosphere, ensuring the implementation of national strategies and policies in their areas of expertise, thus contributing to the economic and social development.	www.ipma.pt/en/

		IPMA will showcase its initiatives on smoked seafood products, nutraceuticals from algae and aquaculture.	
CIIMAR – Interdisciplinary Centre for Marine and Environmental Research		CIIMAR is a leading research and advanced training institution working on the frontier of knowledge and innovation. CIIMAR develops state-of-the-art research, promoting technology transfer to a wide range of stakeholders and supporting public policies in the area of the ocean and sustainable development.	www.ciimar.up.pt
ALGApplus		ALGApplus company is devoted to the production of seaweeds in controlled environment and with organic certification. Sustainable production under the Integrated Multi-Trophic Aquaculture (IMTA) concept, a strong focus in R&D and continuous support to our customers are our keystones. We'll give you a taste of our cultivation processes.	www.algaplus.pt
Olmix Group		Olmix Group is a specialist in marine biotechnology and have developed a biorefinery concept for the extraction of fresh seaweed. The final products formulated from the seaweed extracts provide natural sources of nutrition and health to plants, animals and people, for a complete, consistent food and health chain, thanks to algae!	www.olmix.com
Allmicroalgae		Allmicroalgae delivers high quality microalgae biomass and products, produced with the sunlight in closed, controlled production systems. Allmicroalgae will showcase healthy vegan food products with microalgae (<i>Chlorella vulgaris</i> or <i>Tetraselmis chuii</i>), such as, Allma Super Powders (Mix of superfoods and ingredients with several healthy benefits) and Allma Bars - suitable to vegans and with a high and complete content of protein.	www.allmicroalgae.com www.algaebyallma.com

MyBlueEducation

Name of Entity	Logo	Exhibitor Description	Website
University of La Rochelle		La Rochelle University offers an innovative master's degree to explore the benefits of blue biotechnology to health, nutrition and aquaculture industries. The master addresses skills gaps recognized by employers and provide blue careers opportunities.	www.univ-larochelle.fr
MARE - Marine and Environmental Sciences Centre		MARE is a centre for research, technological development and innovation, with an integrative and holistic approach, concentrating a wide diversity of expertise, skills and capabilities, with a nationwide territorial implementation that develops its activities oriented to societal challenges. At the MyBlueCity, it will showcase the interdisciplinary advanced courses and technical training available.	www.mare-centre.pt
University of Algarve		The University of Algarve demo will showcase three domains: the Blue-oriented educational offer; the dissemination of the main research areas of the Centre for Marine and Environmental research and the Centre of Marine Sciences; dissemination of the main activities of the Division of Entrepreneurship and Technology Transfer of the University.	www.ualg.pt
Université Côte d'Azur		Université Côte d'Azur studies all the facets of marine resources: marine ecology, marine ecophysiology and ecotoxicology, marine biotechnologies, ecosystem modeling, environmental law and blue economy. MARRES is our new MSc. program in Science, Conservation & Valorization of marine resources, interdisciplinary & international, opening Fall 2018.	app.univ-cotedazur.fr/marres

Nova University of Lisbon - FCT	 	Demonstration of projects developed by FCT NOVA related to marine litter, microplastics and the use of drones for marine coastal risk assessment. It will also be showcasing the educational programs developed by the Climate-KIC at FCT NOVA.	www.fct.unl.pt/faculdade/departamentos#dcea
CESAM - University of Aveiro		CESAM - Centre of Environmental and Marine Studies - will present its marine research, advanced courses in marine sciences and infrastructures sea-related of the University of Aveiro. CESAM will showcase its training offer related with the marine sciences and an exhibition of the biota from coastal to deep-sea with economic value for the blue economy.	www.cesam.ua.pt

MyBluePharmacy

Name of Entity	Logo	Exhibitor Description	Website
CyanoCare		CyanoCare aims to develop added-value products based on cyanobacteria. Cyanoflan is naturally produced by a marine cyanobacterium, resulting in a cost-effective and sustainable resource for several biotechnological applications.	www.cyanocare.weebly.com
Sea4Us		Sea4Us is a biopharmaceutical company focused on the discovery and development of new pharmaceutical drugs based on novel marine compounds for unmet clinical needs.	www.sea4us.pt
MARE - Marine and Environmental Sciences Centre		MARE will show how to detect antioxidant substances in seaweeds, which are known to delay the development of several pathologies, through the use of free radicals radical that changes color when is stabilized by antioxidant substances.	www.mare-centre.pt
3Bs – Minho University	 <small>Universidade do Minho Instituto de Investigação em Biomateriais, Biocopoláveis e Biotecnologia</small>	3B's will illustrate the development of marine inspired biomaterials for biomedical application, by showcasing marine materials, compounds extracted from those materials and examples of biomaterials / biomedical applications, as hydrogels, membranes, particles and scaffolds.	www.i3bs.uminho.pt
Bluevert		Bluevert combines the science and the power of the oceans to offer a unique and revolutionary cosmetic product with the exclusive marine complex Plasmarine™, a cellular complex present in marine phytoplankton, unique to the world of cosmetics, capable of repairing cellular damage and fight the ageing process in record time.	www.bluevert.com
Jellagen		Jellagen produces research grade next generation functional non-mammalian collagen products sourced from jellyfish. We currently supply collagen products to the cell culture and regenerative medicine research markets. Our collagen is supplied in solution or as dried collagen and is used to create 2D surface coatings and 3D scaffolds.	www.jellagen.co.uk
Thalasso Caparica		Thalasso Caparica provides services carried out with heated sea water and algae, facials treatments with products of marine origin, sea salts and essential oils for micro peeling, body wrap with algae, and aerosol therapy. In the MyBlueCity Thalasso Caparica will have a mini-spa for small demonstrations of these treatments.	www.thalassocaparica.com

MyBlueBusiness

Name of Entity	Logo	Exhibitor Description	Website
BIOASIS		Bioasis Gran Canaria aims to give firms in the industry facilities and access to a series of advantages whose absence remained up to now an obstacle to starting any activity in relation to farming of marine species.	www.spegc.org/en/tag/bioasis-gran-canaria/
Incubadora do Mar & Indústria		The Incubator is specialized in projects under the Blue Economy and Industry Services, offering 4 types of incubation to adapt to the needs of each company/start up.	www.ieff.pt
Fórum Oceano		Fórum Oceano is recognized as the Portuguese Maritime Cluster which main priority is to promote the sea as a valuable resource for the economy, enhancing cooperation between stakeholders through the intersection of knowledge and support for innovation, internationalization and entrepreneurship.	www.forumoceano.pt
BLUEBIO ALLIANCE		The BLUEBIO ALLIANCE is a national network that aims at collectively organizing the Portuguese marine bioresources value chain, to foster its relations and dynamics, leveraging its SMEs growth and accelerating their internationalization by increasing their outreach and exportations, leading to more jobs and value creation for Portugal.	www.bluebioalliance.pt
Sea Technology Platform (PT Mar) – University of Aveiro		PTMar is a multidisciplinary platform that integrates the vast knowledge available at the University of Aveiro in Marine Sciences and Technologies, with the aim to facilitate its transfer to the industry, government and the private sector in an integrated way.	www.ua.pt/ptmar/
Blue Bio Value		Blue Bio Value is the first accelerator that scales up marine biobased solutions to global market applications in different industries, resorting to science-based and biotech innovations, while helping to tackle important societal challenges.	www.bluebiovalue.pt
DGPM - Direção-Geral de Política do Mar		<p>The Directorate-General for Maritime Policy (DGPM) is responsible for developing, evaluating and updating the National Maritime Policy (National Ocean Strategy), and monitoring the implementation of the Integrated Maritime Policy of the EU in Portugal.</p> <p>DGPM is a Ministry of Sea Entity, also coordinates international affairs within the Ministry, and the main financial instruments related to maritime policy: the European Maritime and Fisheries Fund (EMFF), the European Economic Area Financial Mechanism (EEA Grants) and the Blue Fund (Fundo Azul).</p> <p>Within the Portuguese Government, DGPM is responsible for the coordination of cross-sectoral policies related to the Ocean between ministries, via the Inter-Ministerial Commission for Maritime Affairs (CIAM).</p> <p>DGPM is also responsible for developing and coordinating communication, awareness and the mobilization of society to the importance of the Ocean, and for Ocean literacy initiatives.</p>	www.dgpm.mm.gov.pt
Mermaid Investments		Mermaid Investments is a company dedicated to Seed and Early Stage Investments in The Blue Economy.	www.mermaidinvestments.eu

MyBlueRestaurant

Name of Entity	Logo	Exhibitor Description	Website
ALGUIMYA		ALGUIMYA will present innovative food products with a twist of marine microalgae Chlorella for a natural, healthy and tasty experience and green Submarines daily health supplements based on marine Chlorella. Three supplements will be presented.	www.alguimya.com
Docapesca – Portos e Lotas, S.A		Docapesca will showcase its campaign for the consumption of horse mackerel, explaining the nutritional value and the main fish auctions.	www.docapesca.pt
Acipenser - Caviar Portugal		Caviar Portugal will showcase its sustainable land-based aquaculture, supported in highly efficient recirculation systems with integrated multitrophic levels.	www.caviarportugal.com
MARE - Marine and Environmental Sciences Centre		MARE will showcase its with innovative products developed in a partnership with various companies to show the importance of the Ocean and its biodiversity for food. Products such as Pão d'Algas (algae bread), seaweed gin and seaweed cookies will be available for tastings.	www.mare-centre.pt
SEAentia		While tasting a delicious Meagre ceviche, you can find how SEAentia will produce the most sustainable Meagre in the world through its 3D model and see this amazing fish swimming in a beautiful aquarium.	www.seaentia.com
ALGAplus		ALGA+® seaweeds are the solution for the food and cosmetic companies seeking a natural but customized ingredient assured with quality, traceability, stability of supply and a small carbon-foot print that can help to differentiate their products. To boost the seaweed market we have launched the brands ALGA+® (bulk seaweed), Tok de Mar® (food products) and SeaOriginals (well-being products) that will be showcased together with new seaweed-based food products that will reach the market next year.	www.algaplus.pt
Olmix Group		Olmix Group will present its new brand SAGA, a trademark that guarantees the nutritional value of the food and virtuous methods for cultivation, breeding or transformation in a logic of sustainable and responsible development (without the use of pesticides, antibiotics or chemical additives) thanks to algae.	www.olmix.com
